

## Specialized Sex Offender Supervision

The Specialized Sex Offender program provides increased supervision and surveillance for the sex offender population in Yavapai County. This includes those on probation for having committed a sexual offense and those who have a history of sexual offending. This increased accountability and additional structure is achieved by using a containment approach. The Sex Offender Caseload is staffed by probation and surveillance officers who are specifically trained in the management of sex offenders and who work collaboratively with law enforcement agencies, the community and those specializing in the treatment of sex offenders. While being supervised, sex offenders are regularly reassessed to determine their current risk and needs.
